

For the Administration of ESSAI: The Director of ESSAI is Mr. Hichem RAMMEH and his Assistant: Mrs. Faouzia MANAI The General Secretary: Mrs. Lamia CHOKRI and the Director of Studies and Internships: Mr. Ghazi BELMUFTI, Studies and Internships Service: Mr. Ahmed OUANNA, the Head of Statistics Department: Mr. Farouk MHAMDI and the Head of Information Analysis Department: Mrs. Hajer SELLAMI the Head of Student Services: Mrs. Nadia Ben Fraj and for the IT Department: Mrs. Mariem GHAZOUANI, the Finance Department: Mr. Maher MATTOUSSI, Driver/Vagmaster: Mr. Mohamed CHAOUACHI Security guard : Mr. Allala ENNOUMI and Mr. Lamjed ZAARAA, Housekeeping: Mrs. Najet HERMI and Mrs. Aicha OUERTANI

Studies and Internships Direction: The Studies and Internships Department governs all educational activities at ESSAI, from the first-year intake to the diploma in the third year. This department contributes to the organization and planning of courses, reflects on the evolution of curricula, and implements innovative teaching practices. It also enforces study regulations and academic schedules.

The training at ESSAI emphasizes fundamental, multidisciplinary education. An intense, comprehensive program ensures the selection of the country's future statisticians.

The training program spans three years over five semesters, including a final project lasting four to six months. In addition, students complete a professional integration internship in their first year and an engineering internship in their second year.

The curriculum adapts to market needs. While maintaining continuity and stability in the programs, it includes optional modules to meet new socio-economic demands.

The training covers three main areas: Mathematical Sciences and Statistics, Computer Science and Information Systems, and Economics and Social Sciences. "Soft skills" or professional competencies are a key component of ESSAI.

Students gradually professionalize throughout the training and internships. In addition to scientific courses (Statistics, Economics, Computer Science), ESSAI places significant emphasis on internships, giving student engineers the opportunity to engage with the professional world. ESSAI has established numerous partnerships with national and international companies and institutions, enabling students and engineers to gain professional experience during their studies.
