

Mandatory Internships: - Integration Internship: Conducted during the summer after the first year, lasting four weeks. It allows student engineers to discover the professional world, often as observers, learning to meet company requirements. **Engineering Internship:** Conducted during the summer after the second year, also lasting four weeks. Students carry out specific tasks and meet the company's needs. **Final Year Project (PFE):** Completed during the sixth semester at the end of the third year, lasting four to six months. Students must complete a project with clear objectives, often in a company, supervised by a university professor. This project is defended before a jury of at least three professors, leading to the National Engineering Diploma in Statistics and Information Analysis.

To help students navigate vast career possibilities and promote the uniqueness and excellence of the training, the Studies and Internships Department maintains strong relationships with alumni, businesses, associations, and public institutions. It organizes an annual program of professional and academic conferences and job fairs, and supports students in their internship and job searches.

Departments: ESSAI's teaching is organized into two departments: the Department of Statistics and the Department of Information Analysis, both led by department directors.

Department of Statistics: The Statistics Department, established in 2005, includes over ten professors in pure or applied mathematics, statistics, and computer science. Several computer labs equipped with advanced software are linked to this department. The department maintains close ties with the LAMSIN laboratory at ENIT and several laboratories at the Pasteur Institute of Tunis.

Department of Information Analysis: The Department of Information Analysis at ESSAI is responsible for teaching economics, business management, and corporate finance, as well as languages. Courses are structured around three main areas: Microeconomics, Macroeconomics, Business management and corporate finance.
